Unique Functions:

- **Book Appointment**
- **View Appointments**
- **View Patient Prescriptions**
- **View Nurse Info**
- **Edit Nurse Info**
- **View Doctor Info**
- **Edit Doctor Info**
- **View Admin Info**
- **Edit Admin Info**
- **View Patient List**
- **View Patient Info**
- **Edit Patient Info**
- **Delete Patient Prescriptions**
- **Add Patient Prescriptions**
- **Move Bed**
- **Move Equipment**
- **Assign to Room**
- **Add Patient**
- **Add Staff**

Function: View Patient Info

Inputs: @UserID

Outputs: @UserID, @HealthCare#, @FName, @LName

Pseudocode:

Connect to the database

Query =

SELECT *

FROM Patient AS P

WHERE P.UserID = @UserID

Parse Query

Execute Query

Close connection to the database

Function: Edit Patient Info

Inputs: @UserID, @HealthCare#, @FName, @LName

Outputs:None

Pseudocode:

Connect to the database

Query =

UPDATE Patient as P

SET P.HealthCare# = @HealthCare#, P.FName = @FName, P.LName = @LName

WHERE P.UserID = @UserID

Parse Query

Execute Query

Close connection to the database

Function: View Nurse Info

Inputs: @UserID

Outputs: @UserID, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate, @WardID, @Certificates

Pseudocode:

Connect to the database

Query =

SELECT *

FROM Staff AS S, Nurse AS N, Nurses_Certification as NC

WHERE S.UserID = @UserID AND N.UserID=S.UserID AND NC.UserID = N.UserID

Parse Query

Execute Query

Close connection to the database

Function: Edit Nurse Info

Inputs: @UserID, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate, @WardID, @Certificates

Outputs: None

Pseudocode:

Connect to the database

Query =

UPDATE Nurse AS N

SET N.FName = @FName, N.LName = @LName, N.Salary = @Salary, N.WardID = @WardID,
N.Certificates = @Certificates

WHERE S.UserID = @UserID AND N.UserID=S.UserID AND NC.UserID = N.UserID

Parse Query

Execute Query

Close connection to the database

Function: View Doctor Info

Inputs: @UserID

Outputs: @UserID, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate,
@isSpecialist, @Specialty, @WardID

Pseudocode:

Connect to the database

Query =

SELECT *

FROM Staff AS S, Doctor AS D, Doctor_Is_In_Ward as DW

WHERE S.UserID = @UserID AND D.UserID=S.UserID AND DW.UserID = D.UserID

Parse Query

Execute Query

Close connection to the database

Function: Edit Doctor Info

Inputs: @UserID, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate,
@isSpecialist, @Specialty, @WardID

Outputs: None

Pseudocode:

Connect to the database

Query =

UPDATE Doctor AS D

SET D.FName = @FName, D.LName = @LName, D.Salary = @Salary, D.JobTitle = @JobTitle,
D.isSpecialist = @Specialist, D.Specialty = @Specialty, D.WardID = @WardID

WHERE S.UserID = @UserID AND D.UserID=S.UserID AND DW.UserID = D.UserID

Parse Query

Execute Query

Close connection to the database

Function: View Admin Info

Inputs: @UserID

Outputs: @UserID, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate,
@ClearanceLevel

Pseudocode:

Connect to the database

Query =

SELECT *

FROM Staff AS S, Admin AS A

WHERE S.UserID = @UserID AND A.UserID = S.UserID

Parse Query

Execute Query

Close connection to the database

Function: Edit Admin Info

Inputs: @UserID, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate, @ClearanceLevel

Outputs: None

Pseudocode:

Connect to the database

Query =

UPDATE Admin AS A

SET A.FName = @FName, A.LName = @LName, A.Salary = @Salary, A.JobTitle = @JobTitle,
A.ClearanceLevel = @ClearanceLevel

WHERE S.UserID = @UserID AND A.UserID = S.UserID

Parse Query

Execute Query

Close connection to the database

Function: View Patient List

Inputs: @UserID

Outputs: @Patients

Pseudocode:

Connect to the database

Query =

SELECT P.UserID, P.FName, P.LName, P.HealthCare#

FROM Patient AS P, Doctor_Is_In_Ward AS DW, Patient_Is_In_Ward AS PW

WHERE DW.UserID = @UserID AND DW.WARD_WardID = PW.WARD_WardID AND
PW.PATIENT_UserID = P.UserID

Parse Query

Execute Query

Close connection to the database

Function: Add Patient

Inputs: @UserID, @Password, @HealthCare#, @FName, @LName

Outputs:None

Pseudocode:

Connect to the database

Query =

INSERT INTO Patient

VALUES (@UserID, @Password, @FName, @LName, @HealthCare#)

Parse Query

Execute Query

Close connection to the database

Function: Add Staff

Inputs: @UserID, @Password, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate

Outputs:None

Pseudocode:

Connect to the database

Query =

INSERT INTO Staff

VALUES (@UserID, @Password, @SSN, @FName, @LName, @Salary, @JobTitle, @StartDate)

Parse Query

Execute Query

Close connection to the database

Function: Assign to Room

Inputs: @UserID, @Room#

Outputs: None

Pseudocode:

Connect to the database

Query =

UPDATE Patient_Is_In_Room AS P

SET P.ROOM_Room# = @Room#

WHERE P.PATIENT_UserID = @UserID

Parse Query

Execute Query

Close connection to the database

Function: Move Bed

Inputs: @Bed#, @WardID

Outputs: None

Pseudocode:

Connect to the database

Query =

UPDATE Bed

SET WARD_Ward_ID = @WardID

WHERE Bed# = @Bed#

Parse Query

Execute Query

Close connection to the database

Function: Move Equipment

Inputs: @EquipmentID, @Room#

Outputs: None

Pseudocode:

Connect to the database

Query =

UPDATE Equipment

SET ROOM_Room# = @Room#

WHERE Equipment_ID = @EquipmentID

Parse Query

Execute Query

Close connection to the database

Function: View Appointments

Inputs: @UserID

Outputs: @Appointment

Pseudocode:

Connect to the database

Query = SELECT P.Time,P.Date,P.Reason,S.FName,S.LName

FROM Appointment AS P, Staff as S

WHERE P.UserID = @UserID

INNER JOIN S ON S.UserID = P.DOCTOR_UserID

Parse Query

Execute Query

Close connection to the database

Function: View Patient Prescriptions

Inputs: @UserID

Outputs: @Prescribed

Pseudocode:

Connect to the database

Query = SELECT M.MedicineName, P.Dosage,P.Frequency,P.IsRefillable

FROM Prescribed AS P, Medicine AS M

WHERE P.PATIENT_UserID = @UserID

INNER JOIN M ON M.MedicineID = P.MEDICINE_MedicineID

Parse Query

Execute Query

Close connection to the database

Function: Add Patient Prescriptions

Inputs: @PatientUserID,@DoctorUserID,@MedicineID,@Dosage,@Frequency,@Refillable

Outputs:None

Pseudocode:

Connect to the database

Query =

INSERT INTO Prescribed

VALUES (@PatientUserID,@DoctorUserID,@MedicineID,@Dosage,@Frequency,@Refillable)

Parse Query

Execute Query

Close connection to the database

Function: Book Appointments

Inputs: @PaitentUserID, @DoctorUserID, @Time, @Date, @Reason

Outputs: None

Pseudocode:

Connect to database

Query =

INSERT INTO Appointment

VALUES (@PaitentUserID, @DoctorUserID, @Time, @Date, @Reason);

Parse Query

Execute Query

Close connection to the database

Function: Delete Patient Prescriptions

Inputs: @PaitentUserID, @DoctorUserID, @MedicineID

Outputs: None

Pseudocode:

Connect to database

Query =

DELETE FROM Appointment AS A

WHERE A.PAIENT_UserID = @PaitentUserID

AND A.DOCTOR_UserID = @DoctorUserID

AND A.MedicineID = @MedicineID;

Parse Query

Execute Query

Close connection to the database
